Atom
Photoshop CS6
Illustrator CS6
Majestic SEO
Registercompass

Education
Interaction Design
(30p Malmö University)
Upper secondary technical school
(Upper secondary school Bergagymnasiet Eslöv)

Experience

Peter Landgren & Co
Responsive Redesign 2014-06- (ongoing)

One of the biggest real estate agencies in south Sweden had visual performance issues and lack of congruence in the mobile version of their website. Their identity just didn't shine through for their mobile visitors.

I was hired after networking with their marketing director, and upon finishing the job, I was assigned new tasks.

Bagasell
UI Design & Project Management 2013-08 – 2014-01

A Malmö-based company (One2tel Malmö) needed an easy way to track their orders.
Along with a former Microsoft employee, a back-end developer by the name of Douglas Gale, I created a powerful PHP-based order management system for telecom industries.
I was responsible for the full management process and the UI design.

Siriusrestaurangen
WP Design & Development 2014-12

Siriusrestaurangen in Landskrona, Sweden felt it was time to renew their old website. They wanted to broaden their audience and reach out to the younger generation. The client was pleased with my first sketch, and with excellent cooperation we came up with a solution that exceeded their expectations.

Glorias
Mobile Optimization 2013-07 – 2013-08

Restaurant Glorias in Lund, Sweden were satisfied with their current website but wanted to optimize it for mobile devices. I came up with a proposal that matched their existing design and they liked the fact that the solution maintained their company profile, as well as being optimized for mobiles.
